Data Visualization with Power BI and Tableau

Practical – 3

Roll No.: T050	Name:Aashu Yadav
Class:TYIT	Batch:1
Date of Assignment:14/08/2026	Date/Time of Submission:14/08/2026

Aim:-Creating Advanced Visualizations in Tableau

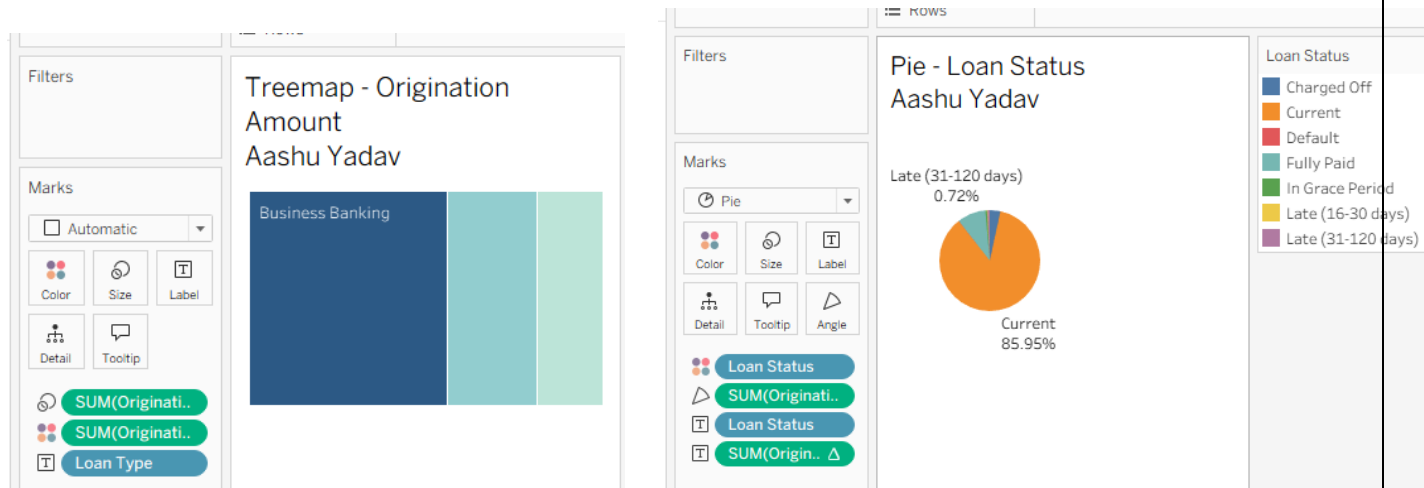

a) Create stacked and grouped bar charts for comparison

Insights

Loan Type and Loan Status show which loans have the highest amounts and statuses.

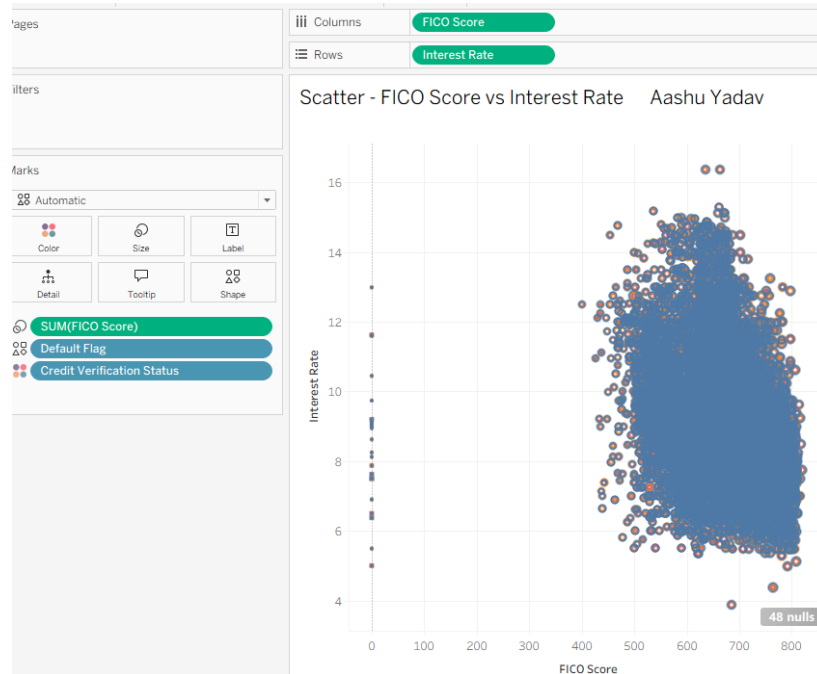

b) Build treemaps and pie charts for part-to-whole analysis

Insights

Treemap and Pie Chart show the proportion of each loan type and loan status.

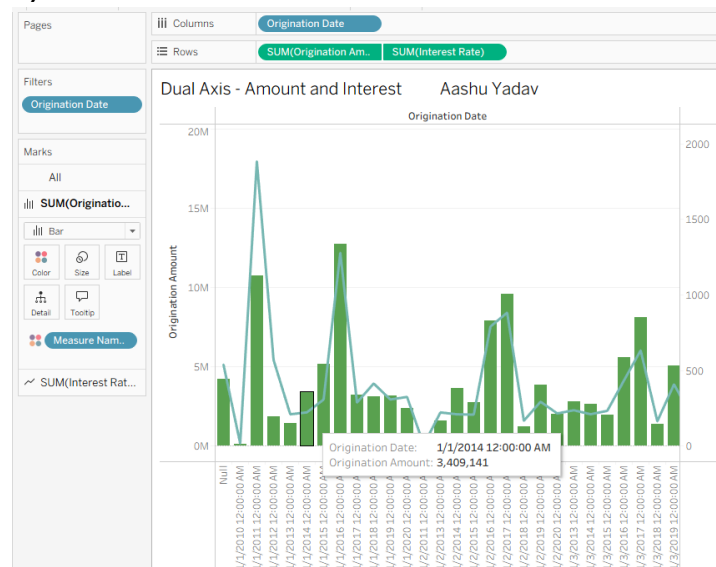

c) Design scatter plots to identify relationships

Insights

FICO Score and Interest Rate help identify the relationship between credit quality and borrowing cost.

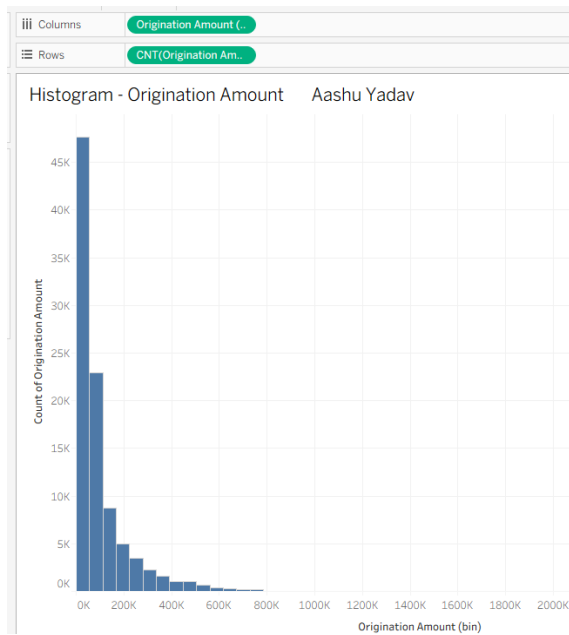

d) Create dual-axis and combination charts

Insights:-

Dual-axis chart shows how Origination Amount and Interest Rate change over time

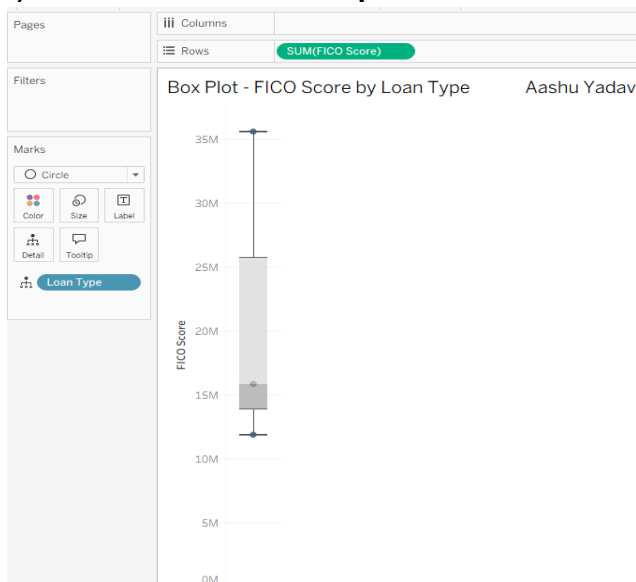

e) Develop histograms for distribution analysis.

Insights:-

Histogram shows the most common Origination Amount ranges.

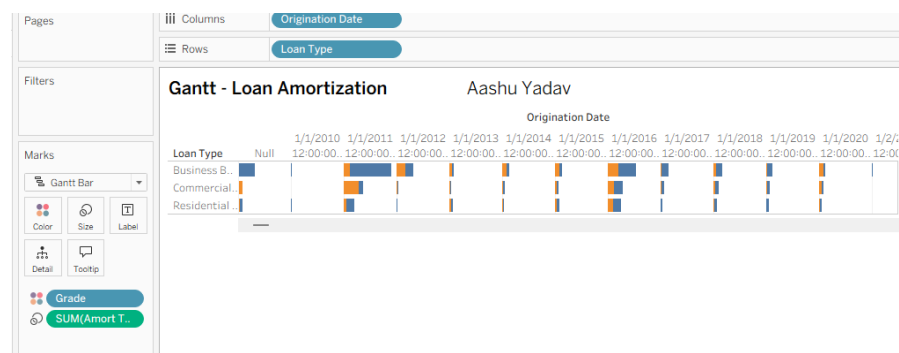

f) Build box-and-whisker plots

Insights

Box Plot compares FICO Score distribution and identifies outliers across Loan Types.

g) Use Gantt charts and advanced date visualizations

Insights

Gantt shows loan duration using Amort Term, while the line chart shows monthly loan origination trends
